

Oxford YourStyle™ Custom Corner Folio

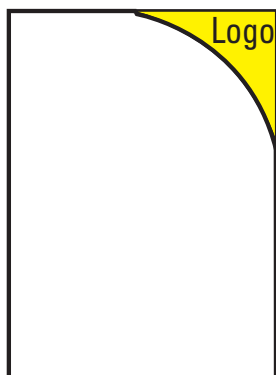

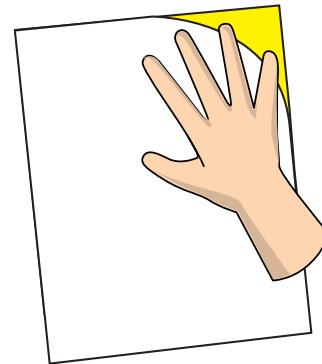

Instructions For Items 50693 and 50694

To create your personalized Custom Corner Folio:

1. Go to **www.pendaflex.com** and select Templates. Use the on-line template, and create your own design. Use your logo, your client's logo or any design you choose.
2. To print, insert one sheet of custom corners into your desktop printer following your printer's instructions. Your design should be on the side of the sheet that says 'PRINT THIS SIDE'. You may want to practice this on a plain sheet of paper before printing on the corners.
3. Allow time for ink to dry. Remove corner carefully along the perforated lines.
4. Remove adhesive backing from inside front cover.

5. With the design side up, align printed corner to the top right corner of inside back cover of folio.
6. Carefully close front cover of folio and press firmly. The corner will now be adhered to the front cover.

**Your personalized
Custom Corner Folio
is now ready to use!**
